

## LCN Romance Nail Polishes – the Trend Colours for Spring / Summer 2010

, den 18.02.2010

**This spring is all about tenderness. It's high time to enjoy the romantic side of life. The new LCN look invites you to take pleasure in these delicate and soft shades.**

**Join us in a world of light-heartedness with LCN's Romance spring look. From a berry violet to a softly shimmering rosé - the colours of the LCN Colour gels inspire a dreamy and romantic look.**

In spring especially when the first tulips raise their heads and the first rays of sunshine create a good mood we are especially sensitive and emotional. Lovely lilac, a transparent shimmering violet perfectly underlines this spring fever.

Now comes the time for a romantic stroll along a lakeside with beautifully arranged flower beds. Love reflection, a berry shade of violet sets coloured accents on the nails. Airy gossamer dresses in silky textures are thus combined with a self-confident demeanour.

Pearly rose, a soft shade of rosé, appears playful and especially feminine. This colour gives an attractive appearance and at the same time seems in need of protection. Magnificent mauve, a soft violet, is perfect for the game of proximity and distance. On the one hand, it conveys a strong sensitivity and on the other hand it is very secretive.

For permanent polishing of the nails LCN offers the Romance Trend Colour gels. The LCN Romance Nail Polishes are perfect for polishing the nails at home. The Romance Colour gels are available individually as well as in a promotional set. In addition LCN offers two different displays.
